This Sarsaparilla is a combination of regetable alteratives-Stillingia, Manmost efficacious medicine yet known for the diseases it is intended to cure. Its ingredients are so skilfully combined that the full alterative

effect of each is assured, and while it is so mild as to be harmless even o children, it is still so effectual as to purge out from the system those impurities and corruptions which develop into loathsome disease. The reputation it enjoys is derived from its cures, and the confidence which prominent physicians all over the country repose in it proves their experience of its usefulness. Certificates attesting its virtues have accumulated, and are constantly being received, and as many of these cases are publicly known,

they furnish convincing evidence of the superiority of this Sarsaparilla over every other alterative medicine. So generally is its superiority to any other medicine known that we need do no more than to assure the public that the best qualities it has ever possessed are strictly maintained.
